

Product Description: RejuvaSil® Silicone Scar Gel is a topical liquid silicone gel, made with a proprietary formula designed to dry quickly and leave a thin, transparent film that does not flake off on the skin.

Product Indications: RejuvaSil® Silicone Scar Gel is used to improve the appearance of surgical and traumatic scars (including normal post-op scars, hypertrophic scars, and keloid scars) and burns. It is applied to a clean and dry scar up to 3 times daily. RejuvaSil® dries to a thin semi-occlusive film on the skin promoting a moisture barrier. This barrier supports the mechanism of action which includes hydration and occlusion.

SECC Chart

SAFETY	<p>RejûvaSil® Silicone Scar Gel is classified by the FDA/CE as an OTC Class 1 Medical Device, which is 510K/PMA-Exempt.</p> <p>RejuvaSil® is indicated for use on epithelialized (closed) skin. RejuvaSil® has been in the market since 2009, is sold worldwide, and has an excellent record of safety with no adverse events reported.</p> <p>Silicone is naturally hypoallergenic, making this product safe for use on all skin types, including younger patients. Please consult your physician.</p>
EFFICACY	<p>Silicone gels are widely accepted alternatives to silicone gel sheeting and are considered a "...first choice for preventing hypertrophy of recent scars."⁽¹⁾</p> <p>An independent research laboratory conducted a monadic 8 week pilot case series evaluation specifically on RejûvaSil® Silicone Scar Gel. Expert clinical grading concluded that all participants exhibited improvements in texture/smoothness, as well as improvement in overall appearance. Seventy percent of the study participants exhibited a decrease in scar length measurement. Clarity Lite photography showed a directional improvement in lightening of the scar after 4 weeks. Maximum improvement was noted at 8 weeks. The p value was noted to be <0.001.</p>
COST EFFECTIVE	<p>RejuvaSil® has an industry-low cost profile. Products of comparable quality retail approximately two to 2.5x the cost of RejuvaSil® and often have a lower silicone content.</p> <p>Physicians receive preferential pricing due to the positioning of the product as physician-recommended and an industry-low return rate.</p>
COMPLIANCE	<p>RejuvaSil®'s proprietary formula and blend of silicones was specifically designed for patient compliance. RejuvaSil® is easy to apply during the day and while on the go.</p> <p>RejuvaSil® dries quickly, is odorless, non-greasy, non-tacky, and has a pleasant satin-like texture. RejuvaSil® is discreet, often unnoticeable, and both sunscreen and makeup can be applied once dried. RejuvaSil®'s attributes maximize patient compliance and therefore efficacy.</p>
